DISPLAY — IBM PLEX SANS ARABIC 700
BODY — IBM PLEX SANS REGULAR 400

One bilingual superfamily, not a Latin face with Arabic bolted on. The packs already carry every bit of energy this brand needs, so the type's job is order. **Two weights in any one layout.**

Arabic leads. Always.

Written first, English fitted to it. 1.7 leading against Latin's 1.5, or the diacritics collide.

THE LINE ALREADY IN MARKET

السطر

This is the client's own line, already running across their market creative, recorded here so nobody invents a second one by accident. **A real brand line is Foundation deliverable 4** and this is not it. · **One Alex Foods mark, and only one:** no secondary lockup, no wordmark version, no alternate colourway. The ground changes underneath it, the mark does not. **Placed as supplied, never rebuilt, never set in a font.**

FOUR SEPARATE BRANDS

FOUR AUDIENCES.
NONE COMPOUND.

Four pages, four follower counts, four content calendars, each starting from zero. The company that actually makes all four stays invisible, and every range pays the cost of being unknown twice.

ALEX FOODS

ONE COMPANY.
FOUR RANGES.

Confirmed 18 September 2026. One presence carries all four, the ranges rotate inside it, and every post builds the same audience. A new SKU launches to people who already know the name.

BRAND PILLARS

ركائز العلامة

01

RANGE

النطاق

Four ranges, eighteen SKUs, one company. Each range keeps its own colours and its own audience, and none of them pretends to be the others.

02

CHARACTER

الشخصية

BeBo's faces, POLEKA's animals, 2MAN's boy. Every range already leads with a character, and they are drawn and paid for. The cheapest content this business owns.

03

ALEXANDRIA

الإسكندرية

The mark carries the Pharos lighthouse and the company name is the city. Alex Foods is a place as much as a company, and that is a story no competitor can copy.

THE RULE THAT GOVERNS EVERY LAYOUT

القاعدة

لون النكهة يملك الخلفية.
لون النطاق يملك الشعار.

The flavour colour owns the field.
The range colour owns the logo.
The master owns the seal, and takes neither.

A BeBo mango pack is a mango field carrying the standard green banner. The banner does not turn orange to match the flavour, and it does not turn navy to match Alex.

USAGE RULES

قواعد الاستخدام

- Arabic is written first. English is fitted to it, never translated into.
- Red on one word per headline. Display size only. Never a paragraph.
- The character leads the frame on POLEKA and BeBo. Always.
- Two weights in one layout. 700 and 400. A third looks accidental.
- Corner frame marks on every hero block. Grid overlay under 5%.
- The seal is placed as supplied. Never redrawn, never retyped.

Four ranges, one company. **Each keeps its own colours, its own format and its own audience** — that separation is the asset, and the master never repaints it.

BeBo

A juice. You drink it.

بيبو

عصير. بيتشرب.

TALKS TO

The kid. They ask for it and often pay from their own pocket money. A parent pays, but the copy does not talk to them.

Apple · تفاح

Identity. The face **is** the pack, and it takes the colour of its own flavour. KIDS ZONE sub-mark, red NEW flash, green banner with the navy keyline that never comes off.

AlRawy

Ready to drink. Straw on the pack.

الراوي

جاهز للشرب. بماصة على العبوة.

TALKS TO

The buyer, and the only adult-facing range of the four. Reassurance rather than excitement.

#F07F13

Identity. Real fruit photography, not illustration, and the most grown-up mark of the four. Carries the Alex seal and a registered ®. **It is a nectar and the pack says so**, so copy never calls it juice.

2MAN

Ice pops. Two live pack lines.

Identity. Illustrated 3D lettering that **cannot be retyped**, and a running boy who carries the whole brand. The tagline عيش جو المغامرة is already written and it stays. **ICE POPS and Bu:Zz share one voice** and differ only in artwork.

TALKS TO

The kid, directly. They are spending their own pocket money, so nobody has to be talked through a parent.

مثلجات. خطان في السوق.

POLEKA

Jelly candy in bottle pouches.

Strawberry - الفراولة
#EC008C

Identity. A full-bleed animal per SKU, so **the character leads every frame** and a post without one is off-brand. Gel lettering, also artwork. **Cola and strawberry share one pink** at ΔE 0.00.

بوليكا

TALKS TO

The child, deliberately. The brand's whole job is being asked for by name, out loud, in a shop.

حلوى جبلي في عبوات على شكل زجاجة.

2MAN runs two pack architectures and both are live. ICE POPS and Bu:Zz / Meyveli are one brand with one voice and two sets of artwork. A caption should never need to know which line it is for. **The POLEKA cola SKU stays out of paid campaigns and out of copy** until the client confirms the artwork rights in writing.

حساب واحد. أربعة نطاقات.

ONE ACCOUNT. FOUR RANGES.

Everything needed to set up and run the Alex Foods presence. No designer required.

01 — PROFILE PICTURE

صورة الحساب

THE ONLY PROFILE PICTURE

The seal on Alex Navy, centred, exported at 320 × 320. **There is no alternate.** It holds on a light feed and a dark one, which is the whole reason it needs no second version.

CLEAR SPACE & MINIMUMS

Clear space: a margin equal to one quarter of the seal's height on all four sides. Nothing enters it — no text, no image edge, no second mark.

Minimum size: 12 mm in print, 56 px on screen. Below that the ring text closes up and the lighthouse disappears.

02 — EXACT SIZES (PIXELS)

المقاسات

ASSET		DIMENSIONS	WHERE
Profile picture	صورة الحساب	320 × 320	IG, FB, TikTok. Square, shown as a circle
Feed post, square	منشور مربع	1080 × 1080	The default post
Feed post, portrait	منشور طولي	1080 × 1350	More feed space. Use it for the ones that matter
Story / Reel	ستوري وريلز	1080 × 1920	Full screen vertical
Facebook cover	غلاف فيسبوك	820 × 312	Safe zone sits in the centre
Google Business photo	صورة جوجل	1200 × 900	Minimum. The listing is the company's, never a range's

03 — POST TEMPLATES

قوالب المنشورات

NAVY — THE MASTER SPEAKS

Brand, company, the ranges together.

RED — A LAUNCH OR AN OFFER

The only full-bleed red in the system.

FIELD — A PRODUCT POST

Flavour colour, the pack leads.

Three repeatable layouts. **Navy** is the company speaking · **Red** is a launch or an offer · **a flavour field** is a product post. On a flavour field the type colour is read off the contrast table, never picked by eye.

ALWAYS افعل	NEVER ممنوع
+ Write the Arabic first, then fit the English to it. + One idea per post. Two ideas is two posts. + Let the character lead the frame on POLEKA and BeBo. + Use Ink #141414 as the default type colour on a flavour field. + Put a dark keyline behind white type on any colour field. + Keep the navy keyline on the BeBo banner over any green. + Name Alex Foods in every bio, sealed pack or not.	- Health claims. غني بالفيتامينات · يقوي المناعة · صحي · مفيد - «٪طبيعي ١٠٠» or "100% juice". BeBo is a juice. AlRawy is a nectar. - Nutrition numbers without the client's written spec sheet. - Price claims. «الأرخص» is unverifiable and starts a public argument. - Availability promises. Never name a shop that is not confirmed. - POLEKA cola and strawberry in the same grid. They are ΔE 0.00 apart. - A company age. Their own materials say 20 years and 25 years.

The NEVER column is exposure, not style. A food page can be reported and a paid ad account restricted on one sentence, and TSA runs the ad account. The rule underneath all of it: **if it did not come from the client in writing, we do not know it.**

05 — WHAT TO POST (CONTENT MIX)

ماذا ننشر

40% PRODUCT المنتج	30% CHARACTER الشخصيات	20% MOMENT اللحظة	10% COMPANY الشركة
The packs, the ranges, the flavours. Eighteen SKUs to rotate, and the product is the hero.	BeBo's faces, POLEKA's animals, 2MAN's boy. Already drawn, already paid for.	The lunchbox, the hot afternoon, the family jug. The occasion, never a claim about it.	Alex Foods itself. The city, the people, the ranges together.

06 — POSTING RHYTHM

إيقاع النشر

PLATFORM	FREQUENCY	PRIORITY
Instagram — Reels + posts	5 / week	Main platform. Reels for reach, posts for the range grid.
Instagram Stories	Daily	Keeps the account warm. Polls and questions do the engagement.
Facebook	4 / week	Weighted higher than usual, deliberately. BeBo and AlRawy talk to mothers, and in Egypt that audience is on Facebook.
TikTok	3-4 / week	Repurpose the Reels. Free extra reach, no extra shoot.

SPEC — EXECUTION PENDING CLIENT ACCESS · Meta admin and the Google account have not arrived

النكهة تملك الخلفية.

PUT THE PACK IN THE FRAME.

For a food brand the pack IS the creative. These templates put the cut-out pack on its own flavour field with the copy underneath. Swap the pack and the field for the SKU you are posting. Nothing else moves.

FEED POSTS — 1080 × 1350

منشورات الصفحة

BeBo · Peach · خوخ · #E4762A

Type ink at 6.1:1, no keyline needed.

AlRawy · Cocktail · كوكتيل · #D6006E

Type white at 5.1:1, no keyline needed.

Both captions are drafts from the Brand Voice Guide, written in Egyptian colloquial rather than translated out of English. **No em-dashes, no health claims, no price, no shop named.**

SHOWN, NOT DESCRIBED

ممنوع

Never in the same grid

Both POLEKA fields are #EC008C at **ΔE 0.00**. At thumbnail size they read as one product. Split them across the calendar and let the character carry the difference.

The keyline is not decoration

The banner on the apple field sits at **1.30:1**. Left is what happens without the navy keyline. **It is non-negotiable on any green, at any size.**

2MAN · #29ABE2 · 7.0:1

POLEKA · #EC008C · 4.3:1

AlRawy · #00A3E0 · 6.4:1

Same formula vertical: pack centred, caption at the bottom, one red call to action. The story covers are where a range gets to be loud on its own.

HOW TO USE THIS

كيف تستخدم هذا

The swap is simple التبديل بسيط

In Canva or Figma: flavour field as the background layer, the pack cut-out from packshots/single/ on top, **the Alex seal** at the top corner, Arabic at the bottom in Plex Sans Arabic 700. **Write the Arabic first, then fit the English.** That is the whole formula.

Check the type colour, do not guess it تحقق من لون النص

If a colour is not one of the eighteen in the Design System, it is not in the system and the post is off-brand. **Bright Pink #EC008C is the trap** — white gives 4.2:1, ink gives 4.3:1, neither is comfortable, so that field always carries a keyline.

Two things this kit cannot do for you أمران خارج نطاق هذا الملف

Alex Foods has no tone block yet. The four ranges have register, sentence length and emoji policy written down. The master account does not, and it is the one that actually posts. **And product photography has not arrived** — every frame here uses pack artwork, which is not the same thing.
