

WHERE EACH PART OF THE SYSTEM GOES.

The locked system is three colors, two typefaces, one tagline and one logo. This document says where each one belongs and, more importantly, where it does not. If a decision is not covered here, default to the more restrained option.

COLOR — WHERE AND WHEN

PRECISION NAVY

#0A0F1E · Primary background

USE FOR	The default background of everything TSA makes: brand documents, proposal and deck pages, video end cards and lower-third bars, website sections, social posts in the "statement / hook" layout, and the header band on invoices.
ALSO	As type color on Cold White backgrounds — invoices, printed leave-behinds, contracts.
NEVER	As type on Surface Navy or on Signal Red: contrast collapses. Never as a headline color on any dark ground. Never lightened, darkened, or "warmed up" for a particular deliverable.

SIGNAL RED

#E8203A · Accent, reserved

RESERVED FOR	The logo bar. Exactly one key word per headline. CTA buttons and their labels. Section eyebrows and rule lines. The guarantee panel — the single sanctioned large red fill in the system. The total row on an invoice. The progress or emphasis mark in a deck.
RULE OF THUMB	Red should read as a decision, not decoration. If you cannot say in one sentence why that specific element is red, it should not be.
NEVER	Body copy or any paragraph. Invoice line items or descriptions. Fine print and terms. Two accents in the same headline. A full-bleed background other than the guarantee panel. Behind Cold White text at small sizes. As a tint, gradient, or opacity variant.

COLD WHITE

#F0F2F5 · Type and light backgrounds

USE FOR	All headlines and all body copy on dark grounds. The background of any document that will be printed or sent to a client to sign: invoices, quotes, contracts, one-pagers. Logo lockups on light grounds. The logo bar when the background is Signal Red.
NEVER	Pure #FFFFFF. Cold White is the only white in the system and it replaces white everywhere — text, fills, borders, icons, exported assets.

SURFACE NAVY — UTILITY

#1A2340 · Cards and panels only

USE FOR	Cards, panels, table rows and sidebars that need to separate from a Precision Navy page. Structure only.
NEVER	Logo backgrounds. Type of any size. Never presented to a client as a brand color, never listed in a palette, never used in a logo file or a social profile picture.

WORKING RATIO

Cold White sits on top of all three as type. If a layout is more than roughly a tenth red, it is wrong — the guarantee panel is the deliberate exception.

BARLOW CONDENSED 800

Display only

USE FOR

Headlines and subheads. Section titles. The logo wordmark. Document titles — including invoice, quote and proposal titles. Numbers and stats; percentages, pixel dimensions, prices, invoice totals. CTA button labels. Video lower-thirds and end cards. The tagline.

NEVER

Paragraphs of any length. Anything below 8pt. Any weight other than 800 — no Bold, no SemiBold, no Regular, no italic. Never letterspaced so wide it stops reading as a word.

INTER

Everything else

USE FOR

Body copy and paragraphs. Captions and image credits. Invoice line items, descriptions, quantities, dates and payment terms. Fine print, terms and conditions, footnotes. Table cells. Email body copy. Form and UI labels. Footers.

NEVER

Headlines. The tagline. Display-size all-caps. Weight 400 for body, 500–600 for small tracked labels, 700 only inside a sentence for emphasis. No italics for emphasis — use weight.

TYPE SCALE

ROLE	FACE & WEIGHT	SIZE	WHERE IT APPEARS
HERO HEADLINE	Barlow Condensed 800	26–40pt	Document covers, tagline panel, social hero posts
SECTION HEADLINE	Barlow Condensed 800	12–15pt	Card titles, panel headings, invoice title
STAT / NUMBER	Barlow Condensed 800	9–22pt	Percentages, dimensions, prices, totals
EYEBROW / LABEL	Inter 600, +0.2em tracking	4.5–5.5pt	Section markers, table headers, captions above content
BODY COPY	Inter 400	6–7pt	Paragraphs, table cells, invoice line items
FINE PRINT	Inter 400	5–5.5pt	Terms, footnotes, caption lines under figures

TAGLINE — "GROW THE STANDARD."

PLACEMENT	Under the logo in the sign-off lockup, separated by a gap equal to twice the height of the red bar. Email signature, on its own line under the name block. Invoice footer, beside the payment terms. Proposal and quote cover. Closing slide of every deck. Website footer. Social bio. Video end card, under the logo.
SET AS	Barlow Condensed 800, sentence case, period always included. "standard" in Signal Red on dark grounds; all Precision Navy on Cold White grounds.
CORRECT	Logo, gap, "Grow the standard." — quiet, once per surface, at the end.
INCORRECT	"GROW THE STANDARD." in caps. Set in Inter. Used as a post headline in place of a hook. Split across two lines. Dropped period. Reworded to "Grow the standard with TSA" or similar. Two taglines on one surface. Repeated more than once on the same page.
RETIRED	"The Only Agency In Alex That Guarantees Your Results." is withdrawn. Remove it from every template, export, profile, signature and deck. It is not an alternate tagline.

LOGO — LOCKUPS AND LIMITS

PRIMARY	Red bar + "THE STANDARD AGENCY". Use where the reader may not know the agency: proposal covers, invoices, contracts, website header, email signature, first slide of a deck. Minimum 32mm wide in print, 150px on screen.
COMPACT	Red bar + "TSA". Use where the full name is already established or space is tight: social posts, story covers, video corner bugs, document footers, merchandise. Minimum 12mm wide in print, 56px on screen.
SIGN-OFF	"TSA." with the period in Signal Red. Dark grounds only. Use to close a video, a deck, or a campaign frame. Never as a header mark.
PROFILE MARK	Compact lockup centered in a circle. Precision Navy circle by default. Signal Red circle for campaigns and launches only. Export at 320 × 320.
CLEAR SPACE	A margin equal to the height of the red bar on all four sides. Nothing enters it: no text, no image edge, no page edge, no second logo.
BACKGROUNDS	Precision Navy, Cold White, Signal Red (bar flips to Cold White), Surface Navy, or a dark footage still under the gradient scrim.
NEVER	Stretched, squashed, rotated, outlined, shadowed or given a gradient. Recolored outside the system. The red bar removed, resized independently, or moved to the right. Placed on mid-tone or busy footage without the scrim. Reconstructed by typing "TSA" in another font. Placed inside a shape other than the sanctioned circle.
