DESIGN SYSTEM

ALEX FOODS

| BeBo · AlRawy · 2MAN · POLEKA

VERSION 1.1

18 SEPTEMBER 2026

PREPARED FOR ALEX FOODS

Grow the **standard.**

كيف يُستخدم هذا المستند

HOW TO USE THIS DOCUMENT

This document defines the colour and type system for all four Alex Foods brands. It is the reference anyone designing for these brands works from.

Everything in it is **governed**. A value that is not in this document is not in the system, and anything using one is off-brand.

WHAT THIS REPLACES

Nothing. There was no colour manual and there were no codes. Building them is what this stage delivers. The packaging was the input, not the answer.

WHAT THIS IS NOT

This is structure and governance, not a repaint. The packs are printed and in market. Where this document records a problem on an existing pack, it records it and writes the rule that contains it. Changing printed artwork is a separate quotation.

WHO DECIDES

TSA owns execution. The client approves or rejects a delivery as a whole, as an outcome rather than an instruction.

DEFINED

1 • THE BRAND ARCHITECTURE

Alex Foods is the master brand. BeBo, AlRawy, 2MAN and POLEKA are ranges beneath it.

Confirmed 18 September 2026. Not four independent brands that happen to share a factory — four ranges of one company, and the company is what an audience is asked to follow.

1 • Master — Alex Foods

The seal sits at the top of the hierarchy, not beside it. It is the corporate mark of الشركة الإسكندرية لتعبئة وتغليف المواد الغذائية, and every range below is a range of it.

Alex Navy #0A0378 is the master's own value — a nineteenth value, ΔE 10.4 clear of BeBo Navy. The seal's inner red is ΔE 3.31 from System Red and collapses into it, so **the master adds one value, not two**. The seal is a rendered 3D object: placed as supplied, never reconstructed, like the 2MAN and POLEKA wordmarks.

2 • Range

Each range's own fixed colours. These never change, for any reason, in any medium. **The master does not repaint what sits beneath it** — four deliberately clashing palettes is what separates the ranges on a shelf.

3 • Flavour

The field colour that owns a pack for a given SKU. Changes per product.

4 • Extended

Colours a range may use in **social layouts only, never on a pack**. Twelve monthly graphics built from three colours look like three graphics repeated four times.

The flavour colour owns the field. The range colour owns the logo. The master owns the seal, and it takes neither.

A BeBo mango pack is a mango-coloured field carrying the standard green banner. The banner does not turn orange to match the flavour, and it does not turn navy to match Alex. That unchanged banner across five fields makes a shelf of BeBo read as one range; the seal makes it read as Alex Foods.

The seal is rolling out, not tiering.

Its absence from BeBo and POLEKA is a print run that has not caught up, not a signal those ranges are held at arm's length. **Printed packs stay exactly as they are. New print carries the seal on every range.**

A value may be shared between ranges where neither owns it as a signature. It may not be shared where one does.

2 • THE MASTER SET – 18 VALUES

Thirty-one sampled values across four brands, rationalised to eighteen. Thirteen were duplicates nobody could tell apart.

	NAME	HEX	RGB	CMYK*	TYPE COLOUR
	Brand Green أخضر العلامة	#1BA34C	27 163 76	83 0 53 36	INK · 5.6:1
	Deep Green أخضر غامق	#2C8C3B	44 140 59	69 0 58 45	KEYLINE · 4.3:1
	Leaf Green أخضر ورقي	#8DC63F	141 198 63	29 0 68 22	INK · 9.0:1
	Lime ليموني	#C6D42E	198 212 46	7 0 78 17	INK · 11.3:1
	BeBo Navy كحلي بيبو	#1E2A6B	30 42 107	72 61 0 58	WHITE · 13.1:1
	AlRawy Navy كحلي الراوي	#1B4F9C	27 79 156	83 49 0 39	WHITE · 7.9:1
	Cola Blue أزرق كولا	#1C74BC	28 116 188	85 38 0 26	WHITE · 4.9:1
	Ice Blue أزرق ثلجي	#29ABE2	41 171 226	82 24 0 11	INK · 7.0:1
	Nectar Blue أزرق نكتار	#00A3E0	0 163 224	100 27 0 12	INK · 6.4:1

* CMYK is an unmanaged conversion, a starting point for a printer and not a press specification.

2 • THE MASTER SET (CONTINUED)

	NAME	HEX	RGB	CMYK*	TYPE COLOUR
	System Red أحمر النظام	#E1251D	225 37 29	0 84 87 12	WHITE · 4.7:1
	Peach Orange برتقالي خوي	#E4762A	228 118 42	0 48 82 11	INK · 6.1:1
	Mango Orange برتقالي مانجو	#F07F13	240 127 19	0 47 92 6	INK · 6.8:1
	Golden Yellow أصفر ذهبي	#F2A00C	242 160 12	0 34 95 5	INK · 8.6:1
	Bright Yellow أصفر زاهي	#FFC20E	255 194 14	0 24 95 0	INK · 11.4:1
	Acid Yellow أصفر حامضي	#FFF200	255 242 0	0 5 100 0	INK · 15.7:1
	Bright Pink وردي زاهي	#EC008C	236 0 140	0 100 41 7	KEYLINE · 4.3:1
	Deep Magenta ماجنتا غامق	#D6006E	214 0 110	0 100 49 16	WHITE · 5.1:1
	Deep Purple بنفسجي غامق	#92278F	146 39 143	0 73 2 43	WHITE · 7.2:1

* CMYK is an unmanaged conversion, a starting point for a printer and not a press specification.

3 • BEBO — POWDERED DRINK SACHETS

BRAND COLOURS — FIXED

	Banner green — logo pillow, never recoloured	Brand Green	#1BA34C
	Wordmark keyline — non-negotiable	BeBo Navy	#1E2A6B
	"NEW" flash only	System Red	#E1251D

FLAVOUR FIELDS

 Peach · خوخ #E4762A	 Mango · مانجو #F2A00C	 Apple · تفاح #2C8C3B	 Cola · كولا #1C74BC	 Pineapple · أناناس #C6D42E
---	---	--	--	--

Rule

The banner never appears on any green without its keyline. On the apple pack it sits at 1.30:1 against the field and the keyline is the only thing holding it.

3 • ALRAWY — JUICE AND NECTAR POUCHES

BRAND COLOURS — FIXED

	Wordmark	AlRawy Navy	#1B4F9C
	The "y" only, never extended	System Red	#E1251D
	Ribbon swoosh	Leaf Green	#8DC63F

FLAVOUR FIELDS

				
Cocktail · كوكتيل #D6006E	Apple · تفاح #00A3E0	Guava · جوافه #1BA34C	Peach · خوخ #E1251D	Mango · مانجو #F07F13

Rule

Nectar Blue is a field colour only. It is never an AlRawy brand element, and AlRawy never shares a layout with 2MAN.

3 · 2MAN – ICE POPS – TWO LIVE LINES

BRAND COLOURS — FIXED

Home colour, the brand's whole world

Ice Blue

#29ABE2

FLAVOUR FIELDS

Colourway blue

#29ABE2

Colourway red

#E1251D

Colourway green

#8DC63F

Colourway orange

#F07F13

Rule

Wordmark letter colours live inside the artwork and are not system values. The voice and the system are identical across ICE POPS and Bu:Zz.

3 · POLEKA — JELLY CANDY

BRAND COLOURS — FIXED

Extended, social only

Deep Purple

#92278F

FLAVOUR FIELDS

Rule

Cola and strawberry share one field at ΔE 0.00. They never appear in the same grid, carousel or story sequence, and the character always leads the frame.

4 • RAMPS

Every master gets tints toward paper and shades toward ink. One flat swatch is what forces off-system colour picking, and that is how a palette dies.

500 is the master and the only value that appears on a pack. 100 and 300 are backgrounds and fills. 700 and 900 are type, borders and depth.

	100	300	500	700	900
Brand Green	 #BCE0C4	 #6BC288	 #1BA34C	 #197E3D	 #17592F
Deep Green	 #C0DABF	 #76B37D	 #2C8C3B	 #266D31	 #204E27
Leaf Green	 #DBEAC1	 #B4D880	 #8DC63F	 #6E9834	 #4E6929
Lime	 #EBEBC	 #D9E175	 #C6D42E	 #98A227	 #697020
BeBo Navy	 #BCBEC	 #6D749C	 #1E2A6B	 #1B2454	 #191F3E
AlRawy Navy	 #BCC9DB	 #6B8CBB	 #1B4F9C	 #194079	 #173055
Cola Blue	 #BCD3E4	 #6CA4D0	 #1C74BC	 #1A5B90	 #184265
Ice Blue	 #BFE2EE	 #74C7E8	 #29ABE2	 #2484AC	 #1E5C77
Nectar Blue	 #B4E0EE	 #5AC2E7	 #00A3E0	 #057EAB	 #0A5976
System Red	 #F3BDB7	 #EA716A	 #E1251D	 #AC211B	 #761C18
Peach Orange	 #F4D4BB	 #ECA572	 #E4762A	 #AE5D24	 #78431F
Mango Orange	 #F7D6B4	 #F4AB64	 #F07F13	 #B76313	 #7E4714
Golden Yellow	 #F8DFB2	 #F5C05F	 #F2A00C	 #B87C0E	 #7F5710
Bright Yellow	 #FBE9B3	 #FDD560	 #FFC20E	 #C29510	 #856811
Acid Yellow	 #FBF6AF	 #FDF457	 #FFF200	 #C2B805	 #857F0A
Bright Pink	 #F6B3D6	 #F159B1	 #EC008C	 #B4056D	 #7C0A4E
Deep Magenta	 #F0B3CE	 #E3599E	 #D6006E	 #A40557	 #710A3F
Deep Purple	 #E0B0E0	 #A060A0	 #800080	 #71228A	 #501D4F

Mixed toward paper and ink rather than white and black. Black-mixed shades go muddy.

5 • NEUTRALS

The layer all four brands share and none of them had. Every document, template, calendar and this book are built from it.

	NAME	HEX	USE	ON PAPER
	Paper	#FAF8F3	Every background. Never pure white.	1.00:1
	Mist	#EDEAE3	Panel fills. Never type.	1.13:1
	Silver	#C9C5BC	Rules and dividers. Never type.	1.62:1
	Slate	#8A8681	Captions at display size only.	3.41:1
	Graphite	#4A4742	Secondary body text.	8.71:1
	Ink	#141414	Primary text everywhere.	17.36:1

Paper is #FAF8F3, never pure white.

Pure white glares on screen and looks cheap in print.

6 • TYPE ON COLOUR

The client's Ink #141414 is the default type colour on a flavour field. White is the exception, and it gets checked.

White type fails on 11 of the 18 masters. Ink passes on 12. The instinct in this category is white on a bright field, and on this palette it is wrong more often than it is right.

MASTER	WHITE TEXT	CLIENT INK #141414
 Brand Green	3.3:1 head	5.6:1 pass
 Deep Green	4.3:1 head	4.3:1 head
 Leaf Green	2.0:1 fail	9.0:1 pass
 Lime	1.6:1 fail	11.3:1 pass
 BeBo Navy	13.1:1 pass	1.4:1 fail
 AlRawy Navy	7.9:1 pass	2.3:1 fail
 Cola Blue	4.9:1 pass	3.7:1 head
 Ice Blue	2.6:1 fail	7.0:1 pass
 Nectar Blue	2.9:1 fail	6.4:1 pass
 System Red	4.7:1 pass	3.9:1 head
 Peach Orange	3.0:1 head	6.1:1 pass
 Mango Orange	2.7:1 fail	6.8:1 pass
 Golden Yellow	2.1:1 fail	8.6:1 pass
 Bright Yellow	1.6:1 fail	11.4:1 pass
 Acid Yellow	1.2:1 fail	15.7:1 pass
 Bright Pink	4.2:1 head	4.3:1 head
 Deep Magenta	5.1:1 pass	3.6:1 head
 Deep Purple	7.2:1 pass	2.6:1 fail

pass = WCAG AA body text at 4.5:1 · head = 3:1, display sizes only · fail = not usable for type without a keyline

7 • THE WORDMARKS ARE ARTWORK

No brand name in this system is ever set in a font.

BRAND	THE WORDMARK IS	CONSEQUENCE
BeBo	Heavy rounded italic sans, customised	Close to typeset. Still artwork.
AIRawy	Rounded sans with a script quality, plus flowing Arabic	Artwork.
2MAN	Custom illustrated 3D lettering, dripping ice	Cannot be retyped. Ever.
POLEKA	Custom illustrated 3D gel lettering	Cannot be retyped. Ever.

All four are placed as supplied vector artwork. Anyone who rebuilds a logo because the file was missing has produced something unusable, and it will be spotted.

PENDING CLIENT INPUT – vector logo files

This is also the hard argument for why vector files are not an optional material: without them there is no legal way to produce a single asset in either stage.

8 • THE FACES AND WEIGHTS

ROLE	FACE	WEIGHTS	COST
Arabic and Latin text	IBM Plex Sans Arabic	400 • 600 • 700	Free
Latin, set alone	IBM Plex Sans	400 • 600 • 700	Free
Codes and specifications	IBM Plex Mono	400 • 600	Free

الأربعاء ٤٠٠ Regular Hamburgetonstiv
الأربعاء ٦٠٠ SemiBold Hamburgetonstiv
الأربعاء ٧٠٠ Bold Hamburgetonstiv

IBM Plex Mono • #1BA34C 0123456789

Two weights maximum in any single layout.

One for the headline, one for everything else. These packs are already visually loud and the type does not need to compete. A third weight is the most common way a tidy system starts to look accidental.

Why this family. Drawn as one bilingual superfamily rather than a Latin face with Arabic bolted on, so there is no visible seam where a line switches script. The mono sibling matters more than it sounds: HEX values in a proportional face do not align in a column, and an 8 reads as a B at 9pt.

The honest tradeoff. Plex runs cool. On BeBo and POLEKA it will not supply warmth, and it is not supposed to — the packs carry the personality and the type carries order.

9 • SCALES

DOCUMENTS AND PRINT — A4

ROLE	SIZE	LEADING
Cover title	72 pt	1.05
Section opener	48 pt	1.1
Page heading	28 pt	1.2
Sub-heading	16 pt	1.3
Body	10.5 pt	1.5 Latin • 1.7 Arabic
Caption	8.5 pt	1.45
Code (mono)	9 pt	1.4

SOCIAL — 1080 × 1350 FEED

Story at 1080 × 1920 uses the same values with more vertical breathing room.

ROLE	SIZE	LEADING	WEIGHT
Hero line	96 px	1.1	700
Headline	64 px	1.15	700
Sub-head	44 px	1.25	600
Body	32 px	1.5 / 1.7 ar	400
Caption and legal	24 px	1.4	400

Absolute floor: 22 px. Nothing goes below it on a feed asset.

Below that it is unreadable on a phone at thumbnail size, which is where most of the audience sees it. It is also exactly the size everyone is tempted to use for the weight statement and the flavour name.

10 • BILINGUAL RULES

These are the ones that break layouts when they are ignored.

1 • Arabic is set first. English is fitted to it.

A layout designed in English and then filled with Arabic will break, every time. Line lengths, optical weight and direction are all different.

2 • Arabic is never a machine translation of the English.

It is written, then the English is matched to it.

3 • Arabic carries more leading than Latin: 1.7 against 1.5.

Arabic has deeper descenders and optional diacritics. Latin leading crowds it and the marks collide with the line below. Equal leading on both scripts is the clearest tell of a layout built by someone who does not read Arabic.

4 • Layout direction is RTL on anything Arabic-primary.

Including column order, the side the logo sits on, and the direction a carousel reads.

5 • Western numerals throughout — 0123456789.

Not because one system is better. These layouts carry both scripts at once, and mixing numeral systems inside one design reads as a mistake. One rule removes a decision that otherwise gets made differently by every designer.

6 • Never stretch, skew or condense a wordmark.

The perspective on the mockups is the pack shape in a 3D render, not a distortion applied to the logo.

11 • NEVER DO THIS

✗ Never recolour a brand colour to match a flavour.

The green BeBo banner stays green on every field. That is what makes five packs read as one brand.

✗ Never set white type on a field that fails contrast.

Eleven of the eighteen masters fail white. Check the table on page 12 before assuming.

✗ Never rebuild a wordmark in a font.

All four are artwork. Two of them are illustrated 3D lettering and cannot be retyped at all.

✗ Never use a colour outside the master set.

If it is not in this document it is not in the system, and the work is off-brand.

✗ Never use three weights in one layout.

Two. One headline, one for everything else.

✗ Never put POLEKA cola and strawberry in the same grid.

They share one field colour at ΔE 0.00 and read as one product at thumbnail size.

✗ Never mix Arabic-Indic and Western numerals.

Pick the rule, which is Western, and hold it everywhere.

✗ Never set Arabic at Latin leading.

1.7, not 1.5. The diacritics collide.

12 · KNOWN DEFECTS IN CURRENT PACKAGING

Recording these is part of the job. Changing printed artwork is not, and is quoted separately.

1 · The BeBo banner nearly disappears on the BeBo apple pack

Banner #1BA34C on the apple field #2C8C3B is **ΔE 7.62 at 1.30:1**, where every other flavour puts it 27 to 54 ΔE clear.

The navy keyline is the only thing holding it together, which is why it is non-negotiable.

2 · POLEKA cola and strawberry are the same field colour

ΔE 0.00. Verified against the supplied artwork, and differentiated only by the character. At thumbnail size in a feed they are one product.

Rule: never in the same grid, carousel or story sequence, and the character always leads the frame.

3 · Trademark exposure on the POLEKA cola pouch

The pouch carries a photoreal contour bottle in red-and-white livery with near-identical Spencerian script. The bottle silhouette is protected trade dress independently of the wordmark. Under the retainer, **TSA's own advertising account carries this to a paid audience.**

Until rights are confirmed in writing, this SKU stays out of paid campaigns and out of copy.

13 • GOVERNANCE

VERSION

This is **v1.1**, dated 18 September 2026. Every page carries the version in its footer, so a page found loose on a desk identifies itself.

What changed in v1.1. Alex Foods was confirmed as the **master brand** rather than a parent endorsing selected lines. Section 1 was rebuilt as a master-brand hierarchy, Alex Navy is recorded as the master's own value, and the seal's absence from BeBo and POLEKA is now governed as a rollout in progress rather than frozen where it sits. No colour value, ramp or contrast verdict changed.

WHAT TRIGGERS A NEW VERSION

A new range or SKU · a change to a printed pack · original artwork files arriving, which would allow values to be re-sampled from source and reissued · a further change to the brand architecture · Alex Navy joining the master table with its own ramp and contrast row.

HONEST LIMITS

Values were sampled from supplied artwork rather than measured from printed packs or read from source files. The relationships between values are sound and the contrast verdicts hold, because those depend on the values as published here. **What is not guaranteed is that a published value matches the ink currently on a shelf.**

From approval onward these values are the brand's colours and the packs are the legacy. That is the correct direction for a system nobody had written down before.

STILL OPEN

Vector logo files	PENDING
Cola artwork rights	PENDING
Company age — materials say both 20 and 25 years	PENDING
Product photography	PENDING
Alex Navy ramp and contrast row	TSA
Type licence confirmation	TSA

APPROVAL

This document is submitted for written approval. Approving it fixes the values above as the system of record for all four brands.
